## Company Introduction

Founded in 1979, in Osaka, Japan, **sanwacompany** is a Japanese housing equipment and building materials company with an in-house design team and an e-commerce website.

We provide a variety of household appliances for personalizing your space, such as kitchens, washbasins, baths, fixtures, and exterior housing materials as well as building materials such as tiles, bricks, flooring, natural stones, and glass.

**sanwacompany's** original products are developed around the design concept of "minimalism" have a high international reputation and have garnered numerous design awards.

- **Company name:** sanwacompany ltd.
- **Address:** 21F, 19-19, Chayamachi Kita-Ku, Osaka, 530-0013, Japan
- **Founded:** August 22, 1979
- **Website:** <https://info.sanwacompany.co.jp/en/>

## Company Introduction

### Strength 1:

### Internationally Recognized Design

Sophisticated design products are essential to provide a stylish space. Our in-house products that are developed around the design concept of “minimalism” have a high international reputation and have garnered numerous design awards. This includes the “Salone del Mobile. Milano Award” at the Milano Salone International Furniture Fair in 2018, where **sanwacompany** was honored to be the first Asian company to receive the award.

### Strength 2:

### Variety of Products for Total Coordination of Your Space

sanwacompany offers a wide selection of products for personalizing your space, many of which are rarely seen in typical houses built for sale. Our main lines are modular kitchens, washbasins, baths, and other products all developed in-house, as well as products selected from manufacturers all over the world to be sold exclusively through sanwacompany.

## Company Introduction

※Especially in Japan

### Strength 3:

## Innovating the Industry with “One Price” for All Customers

We have defied conventions of the general building industry by offering products at the same price under the same conditions regardless of who purchases them, bypassing intermediaries that increase costs.

By simplifying the complicated distribution process, we eliminate the ambiguity in sales price, offer easy-to-understand pricing and reasonably process high-quality products.

## Company Introduction

## Exhibition at Milano Salone

The largest international furniture trade fair in the world, “Salone del Mobile Milano” is held in Milan, Italy. This event not only enhanced our brand value but also provided a trigger for expanding our overseas business. **sanwacompany** exhibited at a biannual event “EuroCucina” (International Kitchen Exhibition) in this fair in 2016 and subsequent 2018, presenting sanwacompany brand to the world.

## From a showing-off to an attractive kitchen

"Witte" has achieved high design at a price range that is easy for many people to reach.

While valuing the realistic texture, we are particular about the beauty of the details and finished it in the ultimate minimal design with outstanding edges. The floating style floats in the air creating a lightness that doesn't become too heavy. It is a kitchen that will become the standard in the future, sublimating the Living-Dining-Kitchen room into a space that people want to gaze at.

**12 color variations in pursuit of a realistic texture**

The main body of the kitchen is available in 6 colors that express a solid feeling like mortar, an aging feeling like rusted metal, and aged wood grain. The handle and architrave are available in two colors: silver and black for a sharper impression. Please enjoy the coordination that matches the interior by combining them freely.

**1. Square sink**

The sink also pursues a minimal design. It has a stylish finish with a square form that suppresses the roundness of the corners.

**2. Storage cabinets on the both front and back side**

In the face-to-face plan, we have a 915 mm depth type with a storage space on the dining side..

**3. Fastening process to create sharp edges**

The corners are cut at an angle of 45 degrees and welding joint together to create a beautiful edge while consolidating the lines into a single line.

**4. Sufficient storage space**

The drawers are wide and deep enough to accommodate pots and cooking utensils. Since it can be pulled out by hand, there is no need for a handle, and the appearance is neat.

## **High-grade model with attention to detail**

A high-end model with attention not only to detail but also to the user experience.

The 6 cm thick stainless-steel worktop and large sink are installed by our highly skilled craftsmen. The storage that uses Blum's soft close drawer rails can be closed quietly and has enough storage capacity to clean up small items around the kitchen. The height of the drawers and materials such as stainless steel and mirror sheets (only the mirror type is used) make it easy to clean the kitchen.

**1. All 6 cm thick stainless-steel worktop is handmade**  
From cutting, bending, welding to polishing, Japanese craftsmen carefully finish each piece.

**Drawer with excellent storage capacity**

In addition to the inner drawer that makes good use of dead space, the worktop is equipped with a small drawer for cutlery (knives, forks, spoons) and chopsticks

**2. Highly acclaimed by professionals, the spacious sink is craftsmanship**

The 80 cm wide square sink was made by a craftsman who produces professional kitchens, and the craftsmanship shines.

### 30 cm high plinth for convenience

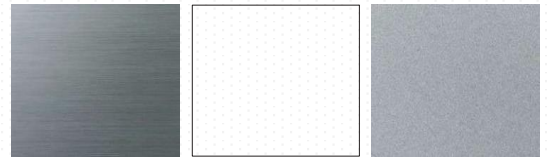

The plinth is made 30 cm to become a shallow drawer storage. This reduces the forward bending angle of the person who cooks every day and reduces the burden on the lower back.

## Simple form stands out

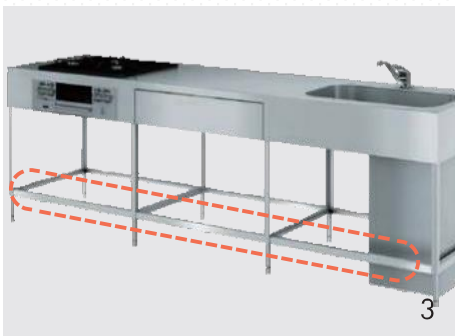

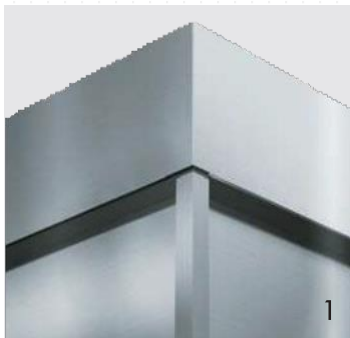

### All stainless steel\* frame kitchen

The simple design with the minimum necessary functions makes the kitchen look sleek and sophisticated. It is also attractive that you can arrange it according to your lifestyle, such as adding shelf boards and installing storage. Also, in addition to the stain-resistant stainless steel, the breathability and ease of cleaning unique to the frame kitchen allow you to keep it clean at any time. It is a kitchen with a high interior quality that meets the needs of users.

## 1. Sophisticated all-stainless

The material is stainless steel with a sense of luxury and cleanliness. The hairline finish moderates the luster and gives it a more sophisticated impression.

## 2. Don't show extra lines

There are no seams or steps between the sharp framework top and the curtain board, giving a clean impression. The texture of stainless steel stands out.

## 3. Removable front frame

You can freely use the space under your feet by removing the frame. \* The parts that can be removed differ depending on the installation type.

## 4. Efficient use of space (optional)

By adding a punching bottom counter, cooking utensils can be neatly stored.

# Kitchen Dresser

## A Cupboard That Impresses with a Sleek 'Surface'

As the name suggests, the 'Kitchen Dresser' allows you to coordinate your kitchen space with a sense of style. You can achieve the desired storage capacity and ease of use based on the combination of units, and it also caters to your interior design preferences with a variety of surface material options and beautiful finishes. Sanwa Company, aspiring to be the 'Stylist of Spaces,' has prepared this to style each customer's ideal kitchen space.

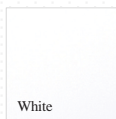

Combine the 'Grad 45' all-stainless steel system kitchen with a mortar stone color dresser for a modern and stylish space that reduces the sense of everyday life. It's also a trend to intentionally coordinate with a different color from the kitchen unit itself.

A total of 14 color variations are available that can be coordinated with the same color pattern as the system kitchen "Elevato", "Witte", and "Plain K Medium".

EX Class

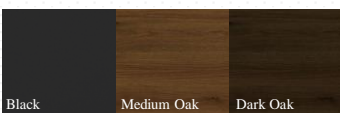

P Class

S-1 Class

S-2 Class

By combining a wide range of units, you can create the perfect cupboard that suits your desired space and functionality.

A variety of unit options are available, including flat and sleek single-door designs and open-style configurations, allowing for a wide range of combinations to be chosen.

**Tall storage**

The single door can be stored in door pocket on both sides. You can normally keep the door stored and easily take items in and out, like an open shelf, and close it when guests visit.

※The choice of having a handle is optional. In the case of no handle, it will be a push latch design.

**Tall single door**

When you open, it will reveal small items storage inside the door. You can conveniently store frequently used kitchen items, such as hanging mittens on hooks or arranging bottles in baskets.

\*Choice of handle available.  
\*Cannot store electrical appliances.

**Opening Undercounter**

We offer the highly requested undercounter open type. It allows you to place a dust box and chairs.

\*Available in separate type, undercounter only type, and tall appliance storage type

A sleek hideaway trash bin wagon.

Equipped with casters, it allows for easy pulling out when using the garbage bin and discreet storage when not in use. It shares the same door material as other cabinets, ensuring a seamless and elegant concealment, keeping your kitchen looking tidy.

\*Available in a sliding counter-equipped open cabinet type and a tall appliance storage open type for your selection.

**Inner Pull-Out Drawer**

The type with a lower pull-out drawer is designed to have two shallow inner pull-out drawers inside the deeper outer drawer, making it convenient for storing frequently used dishes and cutlery. When you open the deeper outer drawer, it is equipped with a synchronized latch that pulls out the top inner drawer as well.

Synchronized latch is included only when selecting Silent Rails.

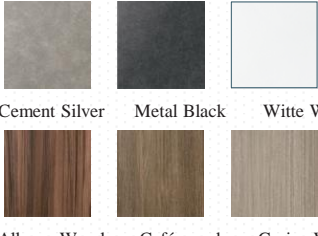

In the case of P class, it is 1 inner drawer + 1 deep drawer.

**Silent mechanism (hinged door)**  
The door closes slowly, so it is safe even for small children.

\* Only EX, S-1, and S-2 classes are available.  
\* Tall storage does not have a silent mechanism for all classes.

## Class and color variation comparison

Class	Surface color	Material	Features	Stain resistance	Flush Kitchen
EX	 Mirror White    Mirror Black	PVC sheet	High-gloss finish adds a sense of luxury. Glossy white exudes cleanliness, while glossy black offers a sense of sophistication, making it perfect for stylish spaces.	◎	Elevato EX Elevato
S-1	 Mortar Stone    Olive leather	PVC sheet (mortar stone) Olefin seat (olive leather)	The trending mortar-style color adds a modern touch to the living space while toning down the sense of everyday life. Olive leather pairs well with both walls and floors, elevating the space with a sense of sophistication. We recommend using the abundant vertical wood grain patterns of the "Witte" system kitchen, as well as the striking real texture of aged metal in metal black and cement silver as accents.	◎	-
	 Cement Silver    Metal Black    Witte White Allegro Wood    Café wood    Greige Wood	Olefin Sheet			
S-2	 Black    Medium oak    Dark oak	DAP Resin veneer	There is a range of colors to choose from, including sleek and modern black as well as woodgrain patterns that create a warm and natural atmosphere.	○	Plain K Medium
P	 White	DAP Resin veneer	It is a relatively affordable price. The matte finish blends into various spaces and tastes.	△	Plain K Medium

# Grad45 Cupboard

## Elevate Your Kitchen with Stainless Steel Coordination

The "Grad 45 Cupboard" stands out with its all-stainless-steel design. When coordinated with the stainless-steel kitchen "Grad 45," it creates a luxurious kitchen atmosphere. Despite its substantial presence, the panel and doors feature the same 45° edge processing as the kitchen, resulting in a clean and sleek design.

- Wooden materials are used for the countertop backing and cabinet core material.
- Please note that Stainless Steel Black is not available.

Body finish

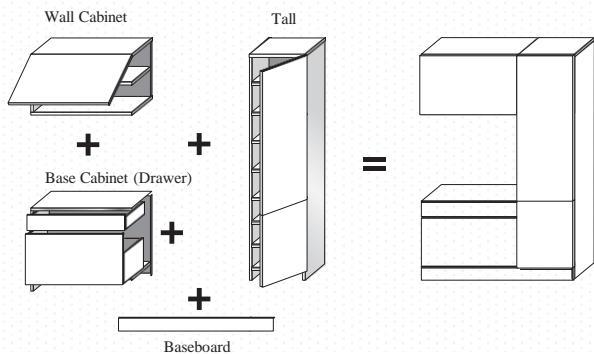

Hairline

Vibration

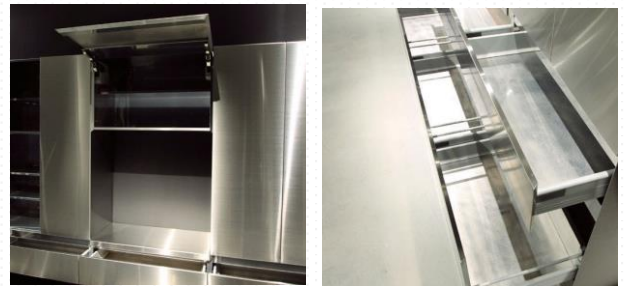

A luxurious LDK (Living, Dining, Kitchen) overflowing with an elegant stainless steel-coordinated design.

## Customize Doors, Shapes, and Sizes

You can create a functional cupboard tailored to your preferences by choosing the doors, shapes, and sizes, much like ordering custom-made furniture.

## Two types: "drawer" and "swinging door"

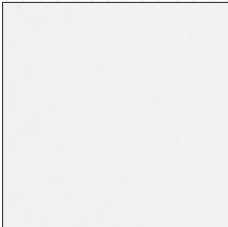

It is a silent specification that does not make a noisy sound when closing both the drawer and the opening door.

They can be seamlessly coordinated with the kitchen. The stainless- steel hairline finish exhibits different expressions based on the angle of light. Wall cabinets come with convenient swing doors. Tall units are equipped with a reassuring earthquake-resistant latch..

# Kitchen Panel

**Original designs featuring a matte, subdued sheen or an aluminum-like texture that are popular**

It is a large-format full-fledged kitchen panel with an original design on a fiber-reinforced cement board. It is light and easy to process, so it is easy to install on site even in a long size. The matte finish and aluminum-like texture will enhance the overall appearance of your kitchen.

## Non-combustible wall material from Trend Materials

It is a non-combustible interior decorative board that is resistant to dirt, fading, and heat, and has excellent functionality and design. In addition to the realistic texture of mortar, it has a unique and authentic feel that can create a space full of grade. Because it is thin and light, it can be easily installed with double-sided tape and adhesive, and it has excellent cleanability, so it can be used not only for water areas such as kitchens, but also for living rooms, bedrooms, and commercial facilities. In addition, a small split type are also prepared that is easy to install.

※We offer finishing materials to beautifully complete seams and corners.

A black and white photograph of a compact kitchen island. The island is a dark, rectangular block with a stainless steel sink and a modern faucet on top. A black cylindrical object, possibly a coffee maker, sits on the island to the left of the sink. A thin black wire is suspended from the ceiling, forming a geometric shape with three dots at its vertices. The kitchen is set in a minimalist room with white walls and a light-colored tiled floor. On either side of the island, there are woven baskets hanging from a rack on the wall. A white rectangular box with a thin border is centered over the island, containing text.

# Sency

| Compact Kitchen

made in Japan

Sency made full use of metal texture such as steel and stainless steel. Making the worktop and sides as thin as possible, it turned out in a simple, sharp and sophisticated design. The embossed paint allows a high-quality matt texture of the cabinet, and one cannot easily notice soiling on the surface with a special process.

Flat bar legs (Optional)

1. Achieved through thinning the thickness of the worktop and sides to the extreme thus creating a sleek and modern design composed only of lines and faces. Sency seamlessly fits not only with the modern spaces but also with the trendy industrial ones.

2. The cabinets can be fully extended for easy access, featuring soft-close mechanism for safety. Rail shape specifications are subject to change.

With its lean and simple design, it goes well with not only modern spaces but also trendy industrial spaces.

# Mortana

| Compact Kitchen

## Compact mortar kitchen that expresses modern personality

Even if you stick to the space design, you can't find a compact kitchen that harmonizes there. "Mortana" is recommended for designers and rental owners who have such thoughts. A minimal design that reduces the feeling of living by narrowing down only the functions necessary for the kitchen. It can also be used as a sub-kitchen for single-person designer apartments, offices, stores, and two-family homes.

# Compact Kitchen 430

| Compact Kitchen

made in Japan

With the image of a stainless-steel box, we have pursued a simple design by eliminating the handles that give a feeling of unevenness. This is a stainless-steel kitchen that has won the Good Design Award for its "minimal style," which eliminates waste to the limit. It is easy to adapt to the background, and the layout and layout can be expanded.

Material stainless steel, specifically SUS430 No.4, chosen for its resistance to rust, odor, and dirt, along with easy maintenance. Design work is done by craftsmen even in small areas, and we offer high quality above the price. It is a kitchen that can meet all needs such as designers' condominiums, senior condominiums, and second kitchens.

# Grad 45 Compact

| Compact Kitchen

made in Japan

The brand-new compact size of "GRAD 45" is packed with sanwacompany's passion for technology and design.

It realized a renewed design giving a high-class look to the kitchen and paying great attention to details, such as side panels and fastenings not showing the edge of the doors. The vibrant finish of the stainless steel softens the glossy effect thus allowing its blending with different spaces.

The use of special fastenings with the made-in-Japan excellent metal processing technology, as well as the 45-degree cuts at the joint of the drawer and cabinet, provides a beautiful sense of unity that hides small edges.

A stylish sink with sharp corners reflects Sanwa Company's craftsmanship technique. The fine vibrant finish gives a soft expression to stainless steel that obtains the typical texture of traditional Japanese handmade paper.

# Fine

| Vanity

made in Japan

“Fine” is a wash-stand whose frame design is the concept.

The thin frame of the stand and the matching mirror maximize the sense of space in your bathroom.

Vanity – Fine

Because all of the screws are hidden within the design, Fine looks very simple and neat. Delivery is easier and the ultra-thin design allows for plenty of work-space while your bathroom is being installed.

There are two choices of color for Fine bowl, Gray or white.

The shelf board and drawer come in 2 color of black and white, allowing you to coordinate to suit your own personal taste.

## Fine Mirror

These mirrors from the same series can be coordinated to create a sense of unity.

White 600

Black 450

## Features of Fine wash basin

### The frame

Design gives a light and sharp impression. You can hang towels etc. on the front frame.

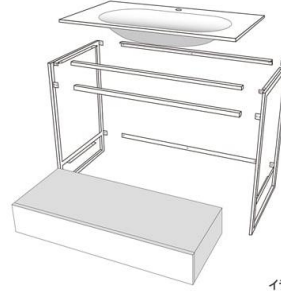

### Bowl (Top Plate)

The sink bowl with integrated top plate has a smooth curve and is designed with attention to detail for ease of cleaning.

### Storage (drawer)

Slide rail with push-open. Simply press the front plate to open the drawer.

## Enjoy the minimalist charm of melamine in the washroom

Constructed entirely with melamine, including the doors, tabletop, and side panels, employing a 'locking' technique where joints are mitered at a 45-degree angle to achieve a seamless finish without visible edges. Moreover, the drawers feature a sleek slide-open design, eliminating handles for a cleaner look. True to its name derived from the Italian word 'estetico' meaning aesthetic, this series boasts a minimalist design that enhances the stylishness of any washroom space. Pair it with the kitchen set from the same series for a coordinated ensemble and enjoy the harmonious coordination.

# Liclair

| Vanity

Create your own sophisticated wash space with your favorite wash bowl and lower stand

Float type black

Drawer type white

Are you seeking to personalize your wash area with your favorite wash bowl and a sleek, minimalist stand? Or perhaps you desire a touch of luxury reminiscent of a high-end hotel?

If you have such a request, the washbasin stand “Liclair” is perfect. Liclair is the ultimate minimal design composed of faces and lines.

The decoration has been trimmed to the utmost so that it fits easily into any washbasin. In addition, it has enough storage capacity to store small items, so you can keep the wash space clean.

There are two offers of wall-mounted units: the 'Float Type,' which appears to float with no visible handles, featuring a flap-down design that opens the door towards you with a push-open mechanism, and the 'Drawer Type,' prioritizing storage capacity with two-tiered drawers for enhanced usability and increased storage space.

#### Float Type

It's a mini marvel of design, appearing as if the cubic 'box' is floating, with no visible seams when viewed from the front.

#### Liclair Float Type

# L-form

| Vanity

made in Japan

**High back countertop washbasin with the ultimate in functional beauty**

L-form is a stylish countertop sink. The sink area is stylishly designed by making everything from the back rise to the front fall in a straight line. In addition to its design, it is also easy to clean and functional..

The sink is deep enough (about 17 cm) to provide plenty of space for a large bucket (10-13 liters). It can be used not only for daily hand washing, but also for washing large items. The drain is placed at the end of the bowl so that it does not interfere with washing.

The high-back section is 3.35 inch deep and can be used to place small items or hand soap.

Two colors are available: clean white and trendy gray.

The bowl can be positioned in the center or on either side of the counter for a more spacious countertop.

center

# Fioretto Vanity

**Make your washroom look like a luxury hotel**

| Vanity

made in Japan

The Fioretto vanity creates a luxurious space with its solid top and beautiful front drop. The countertop and bowl are seamlessly bonded to create not only a beautiful design, but also an easy to clean surface. Seven colors are available in standard and luxury finishes. A variety of sizes and bowl positions are available to meet a wide range of lifestyle needs.

# Fioretto

**In addition to the on-trend color pattern, a double bowl can also be set**

Among the two grades, 'Standard' offers a range of four colors in the greige palette, while 'Luxuriously' features three colors in high-end, textured stone finishes. Both collections present fresh and trendy color patterns that are popular in contemporary interior design. Additionally, with the W1500 size, it's possible to set up a double bowl configuration, allowing for two bowls side by side. For instance, opting for a double bowl in the 'Luxuriously' collection enhances the rich texture of the stone patterns, creating a truly hotel-like washroom ambiance.

### **One-sided bowl type for wider counters**

The counter width is available in four sizes: W750, 900, 1200 and 1500.

The position of the bowl can be selected from right-justified or left-justified for the W1200 and 1500 sizes.

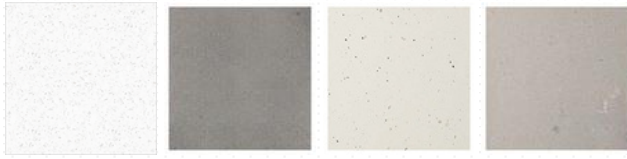

The counter can be spaciously used not only for hand washing and dishwashing, but also for make-up spaces, etc.

Artificial marble tabletop made of quartz, which has the texture and feel of natural stone but is resistant to scratches and stains

# Choice Fit Parts

Depending on the washbasin, the faucets and metal fittings that can be used differ. Please make sure you choose the right one.

## Wash-basin

There are many types such as standing type and wall mounting type. Find your ideal washbasin.

Tabletop type

Wall-mounted

## Drainage Plate

It is a receptacle for flowing water. There is one with overflow that can collect water and one without overflow that does not.

\* Please use an eye plate that matches the washbasin. There is also a hair catcher.

For overflow  
( Push-up formula )

For no overflow

## Water stop plugs

It is a hardware item that connects the water supply pipe and the faucet fittings (faucet). If you turn off this tap, water will not come out even if you turn on the faucet.

\* One shut-off tap is required for a single faucet and two for a mixed faucet. \* In the case of a wall-mounted faucet, a water shut-off tap may not be required.

## Faucet fittings

There is a mixed faucet that produces hot water and water, and a single faucet that produces only water. In addition to the general counter and bowl mounting type, there is also a wall-mounted type.

Counter Bowl  
Mounting

Shower  
Pull-out

Wall-  
mount  
ed

## Overflow

In order to prevent the accumulated water from overflowing, it will be drained from this hole when it reaches a certain amount. It is found in a bowl that has the ability to store water.

## Drainage traps

It is a pipe that connects under the drain valve, one for the wall and one for the floor, depending on the direction of the drainage. The B trap has a clean design, so it is recommended if you can see the trap, such as a washbasin with a wall.

# Industar Vanity

| Washbowl

## A washbasin that expresses Bauhaus philosophy

Industar Vanity, a unique design that prioritizes materiality, usability, and ease of installation. The material shaping this basin is the 'flat bar,' a durable, thick stainless steel favored by modern architectural master, Mies van der Rohe. This wash basin, designed to stimulate the sensibilities of creative individuals, showcases its beauty with every use. Available in two sizes with varying widths and two classic colors with a matte finish, the joints of the parts are inconspicuous, demonstrating meticulous attention to detail achieved through Japanese craftsmanship.

While made of thick stainless steel, the edges give a sharp impression compared to ceramics or artificial marble. The bottom is designed with a gentle gradient towards the drain, making it less prone to water accumulation

# C-Slu

| Washbowl

## Trendy colors and transparency washbowl to fit the room

Beautiful transparency is the next trend in living rooms and attracting attention at overseas exhibitions. C-Slu is a very sensitive sink that anticipates such trends. Its simple shape does not make noise even when installed in a small space, and gives the impression of spaciousness. These sinks also have sharp edges, which are difficult to achieve with glass or ceramics.

The secret of C-Slu's beauty comes from its hard-to-break clear material "C Material", which has never been seen in washbowls in Japan. "C Material", which uses polyester-based resin, is a material that allows us to bring you the beautiful transparency and trendy color that you would love to have for a washbowl.

**Color: Blue, Green, Black, Greige**

Blue

Green

Black

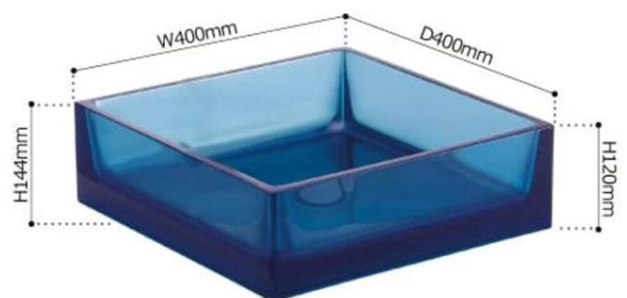

Greige

**Size**

Four color variations with a sense of transparency that shines in both morning light and night lighting.

☛ <Blue> and <Green> are trendy colors that accent a simple space, giving a special uplifting feeling to your daily personal hygiene.

☛ <Black> and <Greige> are calming colors that combine a sense of trend and a sense of grade.

# Tehachi

| Washbowl

made in Japan

**Pursue the smallest size that can be washed by hand. Versatile in various places**

The biggest feature of "Tehachi" is its compact size, one of the smallest in the world. Just like the chouzubachi used to purify oneself at shrines and temples, the name refers to a small vessel used to wash one's hands before entering an important place.

It can be installed in small spaces in various places, from the entrances and corridors of houses to shops and public facilities. At home, it can be used not only for frequent hand-washing habits, but also for watering plants.

The bowl, counter and towel bar are integrated into a simple, linear design. The edges are raised by 5mm to prevent water from spilling onto the floor.

Even with the depth of only 12cm, it is large enough for handwash. Tehachi is characterized by its compactness, its weight 1.5kg is lighter than a typical wash bowl.

# Cara

| Washbowl

made in Japan

“Cara” - a washbowl of minimum thickness and flat surfaces, enabled by proud Japanese metal processing in both plating and welding.

Great performance is exerted in wet areas due to the base stainless steel with a hybrid coating (organic/inorganic) with high hardness and durability and low pollutants.

The matte monotone texture adds modern taste to a space, and open shelf provides a neat storage for bath items.

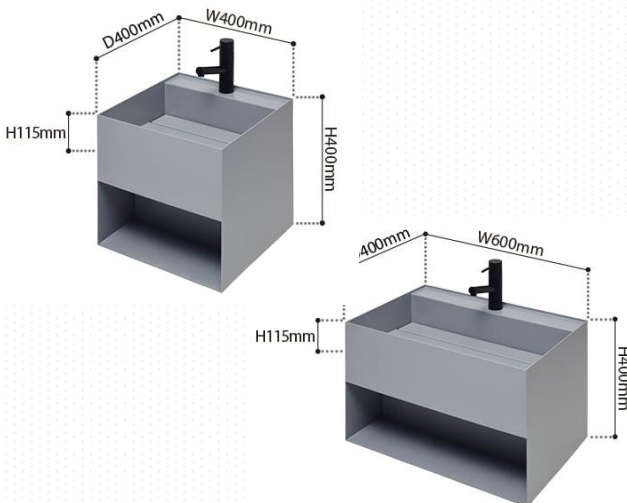

Right-angled bend process was used during plating, to realize a sharp and simple design for ultimate minimalism for any space. Unlike ceramics, high-temperature firing is unnecessary, contributing to a CO2 emissions reduction effect.

# Asse

| Washbowl

made in Japan

## Mastering the Trend of Thin Edge Lines

The trend in recent years has been for washbasins to have thin edges. “Asse“ with stainless-steel material – has achieved a thin edge line that cannot be expressed in artificial marble or ceramic. By using a right-angled bend process taking advantage of Japanese metal processing techniques, it is only expressed as lines and surfaces without R-corners.

The user-friendly storage shelf adds an eye-catcher for the design. Drain hardware, including a perforated plate, is completely hidden to realize the beautiful design from every angle. Due to the metal material, the product is crack resistant. A hybrid inorganic/organic coating with high hardness and excellent stain and weather resistance is used for the coating.

# Orlonof

| Washbowl

## Edgy design and matte texture

The edgy, sharp design, chic color, and matte texture of the painted finish create a minimalist modern washroom space.

# Orlonof

A washbasin with an edgy design made from artificial marble. Make the edges stylish by making them slim to the limit.

Eliminating as much decoration as possible, the linear design that is extremely simple stands out with an edge unique to artificial marble that is impossible with pottery and glass.

The plate, on which small objects can be placed, can be moved from side to side and is easy to remove.

Hemisphere made by a metal lathe is almost perfect circle, and circular slit and simple form express the universal beauty.

# Angolo

| Washbowl

made in Japan

ANGOLO is a stainless-steel wash-hand basin designed for bathrooms with tight space constraints, e.g. for shops and bachelor apartments.

Its minimal size realized by a stainless-steel top panel with a round sink allows for effective use of space even in a narrow wash-hand space.

The 3 mm stainless steel top panel is strong enough to withstand hard use and is easy to clean and gives the sink both durability and a pleasant appearance.

### Variation

The lineup includes two types: "Angolo Flat," which is installed on a flat wall, and "Angolo," which fits snugly into a toilet corner

#### Specification

# Shigaraki En

| Washbowl

made in Japan

## Fusion of Traditional Shigaraki Ware Technology and Design

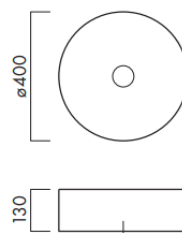

Shigaraki ware, which has been handed down from the Middle Ages to the present and is counted as one of the "Six Ancient Kilns of Japan", is characterized by its rustic taste that comes from rough clay. "Shigaraki En" brings out the pottery techniques with sanwacompany's simple design. The two monotone colors and the perfect circular form give a clean impression that is in harmony with the Japanese spirit.

made in Japan

## Impact and practicality realized in a space-saving design

At 17 cm deep, this minimalistic design wall-mounted hand wash basin is extremely slim and space-saving bringing an edgy feeling. Using stainless steel as the base material, the minimalist design with thin edges, which makes full use of Japanese metalworking technology, makes a fresh impact on the user.

The high-back design with high hardness and durability coating also provides practicality to guard against water splashes. Durable stainless steel is used as the base steel material to achieve the latest interior trend slim edge.

# Lepto

**Slim hand wash basin with 170mm depth  
New gray color now available!**

Fit neatly into limited spaces. The compact hand wash basin 'Lepto', embodying the aesthetic consciousness of the Japanese, now comes in a new color: gray. Gray harmonizes easily with any space and serves as a moderate accent, complementing wood textures and gold accessories. While existing white and black options feature a glossy finish, the gray variant boasts a matte finish that reduces shine, aligning its texture with current trends.

# LEPTO INWALL

| Washbowl

Well organized limited space – this is one of Japanese sense of beauty. The concept of our product, slim wash basin Lepto, is coming from this Japanese sense of beauty.

LEPTO INWALL is our new product, as you can guess, in-wall type Lepto. Place Japanese smallest slim wash basin into your wall. It needs less space but creates simple and clean space. Cabinet hides drain-pipe, and also stock some toilet paper.

Dimensions

W460 × D250 × H800mm

Materials: Artificial marble

# Tubo

| Accessories

made in Japan

"Tubo" is a series of bath accessories that are made up of thin and beautiful round pipes that softly color washrooms and sanitary spaces. The design, which consists of thin cylinders, creates a delicate and light impression. Another nice point is that the price is affordable even though it is made in Japan. With a simple design that you will never get tired of and color variations, you can coordinate it with various spaces.

# Tube

**Tube Paper Holder**  
W160 × H40 × D80mm

**Tube Towel Ring**  
W210 × H40 × D60mm

**Tube Towel Bar**  
W470 × H20 × D60mm

## 1. A simple form composed only of cylinders

Minimalistic and simple form with reduced design elements, "Tube" looks neater by realizing a fit that does not show the fixing screw.

## 2. Color Variations

In addition to the pure white, black, and silver colors that give a stylish impression, bronze, blast gray, and mortana gray have been added with a wide range of coordination in mind.

## 3. Coordinate it with various spaces

The design, which consists of thin cylinders, creates a delicate and light impression. Another excellent point is that the price is affordable even though it is made in Japan.

# Industar

| Accessories

made in Japan

## A vintage stainless-steel accessories reproducing Bauhaus functionalism

The base material is stainless steel, which is highly durable for commercial use. The shape was created from a single sheet of stainless steel by sheet metal working alone, aiming for a universal functional beauty with minimal decoration. Industar can be used not only for washrooms but also for interior storage.

# Industar

**Single Shelf ME09109**

W350 × H62 × D120mm

**Double Shelf ME09119**

 \*Can be used in water areas (kitchen, washroom, toilet), including bathrooms, but avoid installation in places where water constantly splashes.

# Color Faucets

Create a washroom space reminiscent of overseas style with a matte paint finish.

For a matte finish with no gloss, our original color faucets are recommended to be paired with washbasins that share a similar matte texture. Matching the colors of the faucet and washbasin creates a sense of unity in the overall design of the bathroom, while contrasting colors enhance the aesthetics of the washbasin's design.

Water stoppers and drainage fittings

## Drainage fittings

In drainage fixtures, there are drainage gratings that serve as the inlet for water flow, and drainage traps installed below the drainage valve, with specifications varying depending on the type and purpose of the wash basin.

### Drainage traps

B Trap [Wall Drainage]

The trap is shaped like a bottle, featuring a neat design. It is recommended for situations where the trap is visible, such as wall-mounted wash basins

P Trap [wall drainage]

This is a structure where water accumulates and acts as a plug by bending the drainage pipe into a P-shape. It is designed to horizontally exit the wall.

S Trap [Floor Drainage]

This is a trap designed specifically for floor drainage systems with an S-shaped bend in the drainage pipe.

### Drainage Plate

Two types are available: one with an overflow for water retention and one without an overflow. Each type comes with or without a hair catcher to prevent the entry of hair and other debris.

For without overflow

Hair Catcher

Stainless (WA08011)

Matte White (WA34001)

Matte Black (WA34011)

■ Pop-up waste drainage plate for overflow

### Black Drain Trap

The matte black original drainage trap is now available. It's recommended for trendy monochrome coordination with black faucet fixtures and Gray wash basins.

## Bath – Door - Storage

●●● **sanwa**company

# Novum

| System-Bath

made in Japan

A system bath "Novum" that has both stylish design and functionality.

Since it is a place that is used every day, it has been renewed in consideration of its beauty and ease of use, its resistance to dirt, and its ease of maintenance.

We also offer a full range of options for upgrading the bathroom to provide a comfortable space as you wish.

# Novum

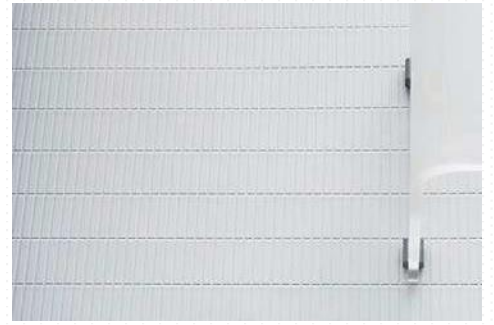

**A system bath "Novum" that has both stylish design and functionality.**

Since it is a place that is used every day, it has been renewed in consideration of its beauty and ease of use, its resistance to dirt, and its ease of maintenance.

We also offer a full range of options for upgrading the bathroom to provide a comfortable space as you wish.

### Clean Floor

The edge of the floor is raised, making it stain-resistant and waterproof. In addition, the floor surface is uneven to prevent slipping and to make it easy to dry.

Stylish without feeling like "storage"  
Stainless steel mirror shelf

※イメージです

### Bubble bath at home!

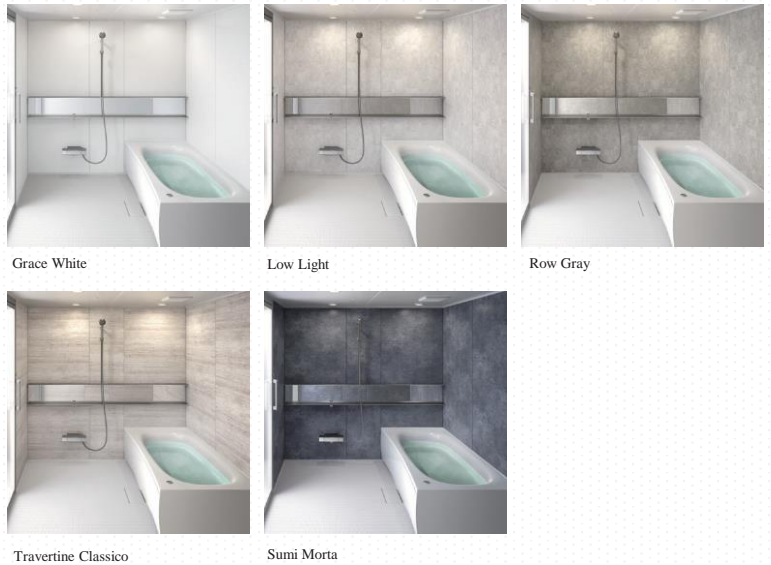

Ultra fine bubbles, which are too small to be seen by the naked eye, are generated when the water is heated and when the water is reheated. The effect is expected to have a warming effect that keeps the body warm to the core, a cleaning effect that makes it easier to remove sebum and dirt, and a beautifying effect that increases the moisture content of the skin.

**Wall Panels** Standard Specifications

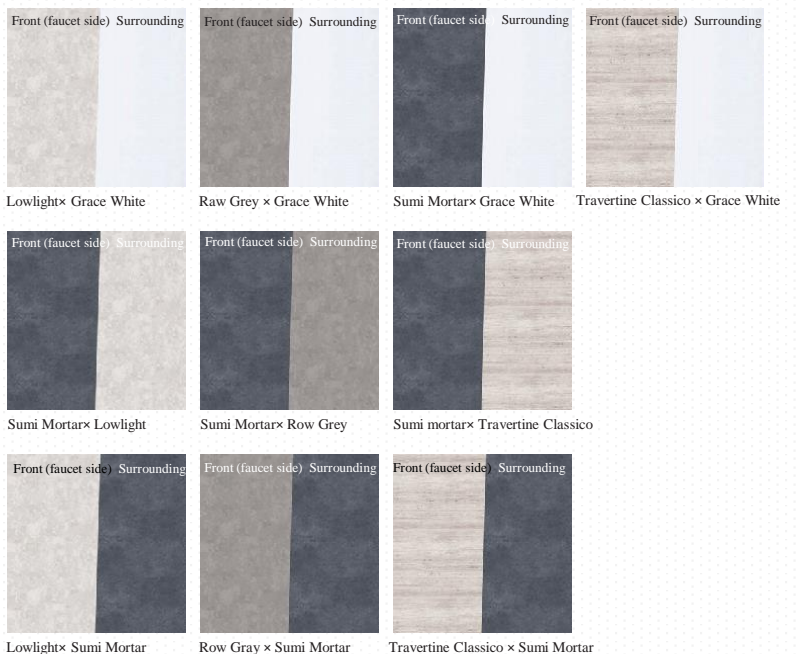

All 15 patterns of wall panels create the ideal space. For the wall panels, which greatly affect the impression of the bathroom, you can choose from a total of 15 patterns, 5 patterns that incorporate trendy mortar tones and grayish colors to make the entire surface the same color, and 10 bi-color accent wall patterns. Coordinate with the bathtub and floor to achieve the space of your choice.

**All the same color walls**

**Accent wall**

There are different color patterns for the front and surrounding walls to combine and achieve a good match. Pairing different color patterns of walling will give an impression to the bathroom.

## Bathtub shape

Standard Specification

### Pursuing a relaxing bathtub shape to match the space

For detached houses, we offer an arch bathtub, which is shaped to allow the user to stretch his or her legs in hot water up to the shoulders, and for condominium remodeling, we offer a simple, flat, straight bathtub.

Arch bathtub (for detached houses)

Straight bathtub (for condominium renovation)

The photo shows the shape of the 1116 and 1216 sizes (without armrests). 1317 and 1418 sizes have armrests.

## Bathtub heat insulation

Option

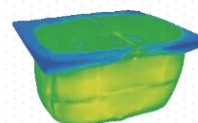

### Warmth that completely envelops the bathroom

The bathtub is wrapped with heat-insulating material, and the bath lid is also insulated to provide a high heat-retaining effect. With a heat-retaining bathtub, you will be greeted with a warm bath even if you return home late.

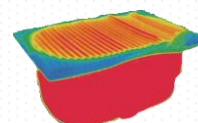

Comparison of heat retention performance by thermography

Insulated bathtub

The outside of the bathtub is low temperature (blue) because it is almost impossible for heat to escape.

Uninsulated bathtub

Heat escapes rapidly, and most of the outside of the tub is red.

[Measurement conditions] Taken with Thermopure 10 minutes after closing the bath lid at a water temperature of approximately 43°C and full of water.

In the case of bathtub heat insulation, the bathtub cover is an "insulated lid".

## CLEAN BATHTUB

Option

### Beautiful luster and smooth touch make it hard to get dirty and keep clean for a long time.

The firm thickness and smooth surface give it a high-quality feeling and texture when you sit on or rest your body on it. In addition, the material is kneaded with stain-resistant ingredients to prevent stains and scratches, making it easy to clean.

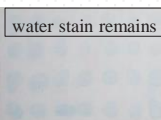

Water-repellent and oil-repellent ingredients are blended into the material, making it resistant to water stains and sebum stains

### ●Comparison of water stain removal performance

(Compared with a durable sample equivalent to 1 month of water stain adhesion and 10 years equivalent to the surface of the bathtub)

FRPbathtub

Clean bathtub

After dripping the water stain component, dry and rub lightly with a force of 500g weight.

After dripping the water stain component, dry and rub lightly with a force of 500g weight.

\* The water stain in the photo was artificially developed based on the actual ingredients (according to company P) and is colored for easy identification. Experiments were conducted on the average concentration of the ingredients nationwide.

### ●Comparison of antifouling performance of sebum oil (oleic acid adhesion experiment)

※Oleic acid: the main component of sebum. It is also included in cosmetics. \* Oleic acid is colored for easy identification.

# Shower Booth 700

| Shower Booth

made in Japan

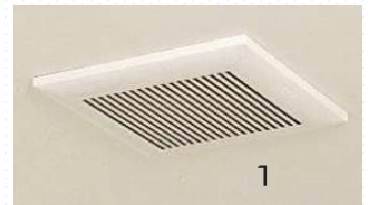

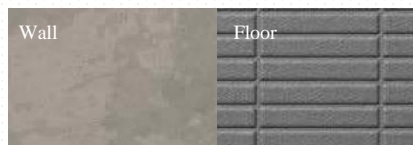

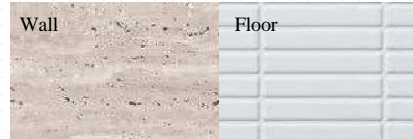

## Elegant Shower Time Surrounded by High-Quality Design

Shower booths are ideal for today's busy lifestyles, allowing you to work up a sweat more easily than taking a bath. Enjoy a moment of healing in a premium space with both design and functionality in a space-saving design.

In addition to the existing two colors of white and black, the wall panels now come in the same four colors as sanwacompany's "NOVUM" system bath.

The floor is designed to be comfortable for wet feet, and is coordinated with the wall panels in the same color. In addition to the environmentally friendly wall panels, stylish vertical mirrors, and other high-grade components, options are available to further enhance the luxurious feel of the shower stall. Three ceiling heights and two depths are available, and the 0712 size can be arranged to suit your needs, including the option of a single swinging door.

[Basic Components] Ceiling panel: Decorative steel plate (Grace White)  
 Wall panel: Decorative steel sheet (Grace White, Black Random Line, Low Light, Travertine Classico, Sumi Mortar, Low Gray) Low Gray)  
 Floor panel (waterproof pan): FRP (medium white, medium gray)  
 [Drainer cover and drainer trap: Resin drainer eyelet / drainer trap with hair catcher  
 [Country of origin] Main unit: Japan

# Traspa

| Shower booth

**The space looks spacious and clean.**

Minimal design wrapped in glassThe shower booth "Traspa" is designed to be as simple as possible, consisting of only the minimum number of elements. It is made of tempered glass, which is highly durable and maintains a sense of openness in the space without being overly conspicuous.

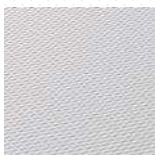

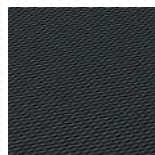

**Composed of a minimum number of parts**  
 “Traspa” is composed of the minimum number of parts, with no waste down to the smallest detail. The corner joints have been made as thin as possible to create a beautiful shower time as if it were made only of glass.

White Floor

Black Floor

# Balnea

| Half Unit Bath

**A half-unit bath that realizes a discerning space is born**  
You want a stylish bathtub in your bathroom. However, the waterproofness of the unit bath and the ease of maintenance are also hard to get rid of. The "Balnea" has been long awaited by such people and has finally been born.

This is a so-called "half unit" that combines the advantages of a unit bath with those of conventional construction. The bathtub is designed to be easy to use, with the piping for the reheating system, which would normally be exposed between the walls, is placed under the floor. The structure prevents the drainage from the bathtub from flowing into the washing area. You can choose your favorite bathtub and tiles to create the bathroom you want.

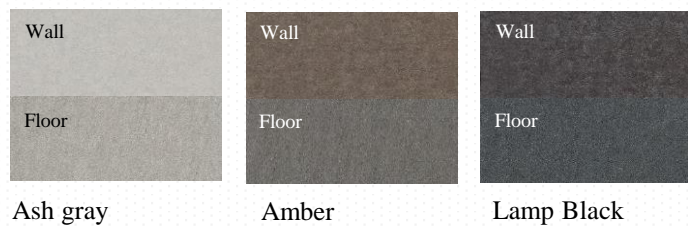

The lower part of the space is packaged with the advantages of a unit bath, making it easy to choose wall and floor combinations.

The upper part of the space can be finished freely using conventional construction methods, and is recommended for cases with windows and beams. Enjoy coordinating with Sanwa Company's original bathtubs, which are popular for their modern design.

### Wall – Floor Tile

The walls and floors are porcelain tiles with a luxurious feel. You can choose from 3 combinations.

\*The combination of wall and floor tiles cannot be changed.

# Quadro Slim

| Door

**New additions include bronze frames and ribbed glass, enabling heights of up to 2600mm.**

"Quadro Slim" is an extension of the ancient Japanese sliding door culture. The minimalist design with a 16mm frame and glass inlay creates a connection between spaces and creates a quality atmosphere of unobstructed space. New additions include bronze-colored frames and 'ribbed glass' with texture. Furthermore, customization is now available for ceiling heights up to 2600mm, expanding the possibilities for spatial design.

4 Draws Draw Difference Standard Door Type Frame / Bronze Glass Type / Rib Color / Clear

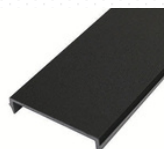

Discover a slim 16mm frame design. With its top-hanging mechanism, there's no need for a floor rail, creating a sense of spaciousness in the room.

The handle seamlessly integrates with the frame for a sleek design.

# Quadro Slim

## Glass partitions of high quality design

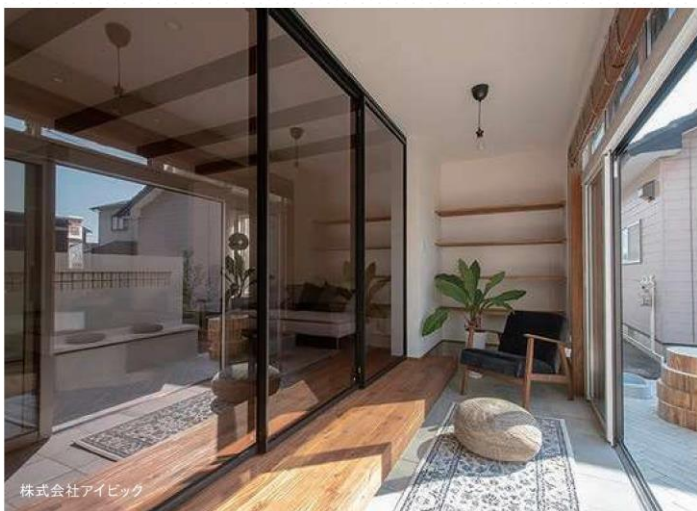

"Quadro Slim" is an extension of the ancient Japanese sliding door culture. The minimalist design with a 16mm frame and glass inlay creates a connection between spaces and creates a quality atmosphere of unobstructed space.

# Quadro Slim

It functions as a partition that keeps a delicate sense of distance as if there is a "fusuma" in the same space.

The minimalist design with glass inlaid in a 16mm frame creates a connection to the space and creates a high-quality atmosphere with nothing to shield.

# Variation

## Single-sided door / parent-child door

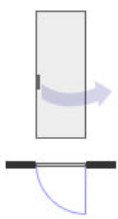

The frame is made extremely thin, and the handle is designed to integrate seamlessly with the frame. The spacious glass surface is emphasized, maintaining a sense of connection with adjacent spaces. The parent-child door consists of two panels, a regular door and a smaller child door, allowing for a wide entrance when necessary. This design facilitates the easy movement of large furniture and entry/exit for wheelchairs, making it especially recommended for entrances to living rooms.

## Partition Door/FIX

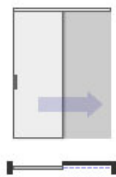

Continuing the tradition of Japan's sliding door culture, these partition doors serve as subtle barriers, allowing for a sense of distance as if there were 'shoji' present in the same space. The newly introduced FIX type maintains an open atmosphere while zoning the space without the need for people to come and go.

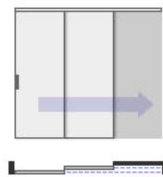

### ■ Door Type

1 sliding door

2-panel sliding door.

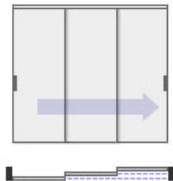

3-panel sliding door.

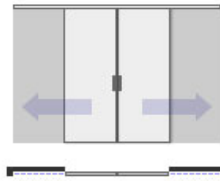

2 Panel - Multi Sliding

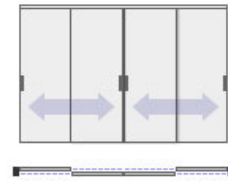

Fixed Unit

3 Panel - Multi Sliding

2 Panel - Sliding Bi-part

4 Panel - Sliding Bi-part

## Single-sided door / parent-child door

The simple single-hinged door maintains an open feeling with its transparent design, as there are no vertical bars dividing the glass surface. The frame, reaching up to the ceiling and designed to be as slim as possible, enhances the expansive impression of the glass surface.

The parent-child door consists of two doors: a regular door and a child door. The advantage is that the child door can also be opened and closed as needed, creating a wide entrance. It is convenient for moving large furniture in and out and for entering and exiting in a wheelchair, especially recommended for entrances to living rooms. It also excels in light transmission, allowing for a brighter space.

## Partition Door/FIX

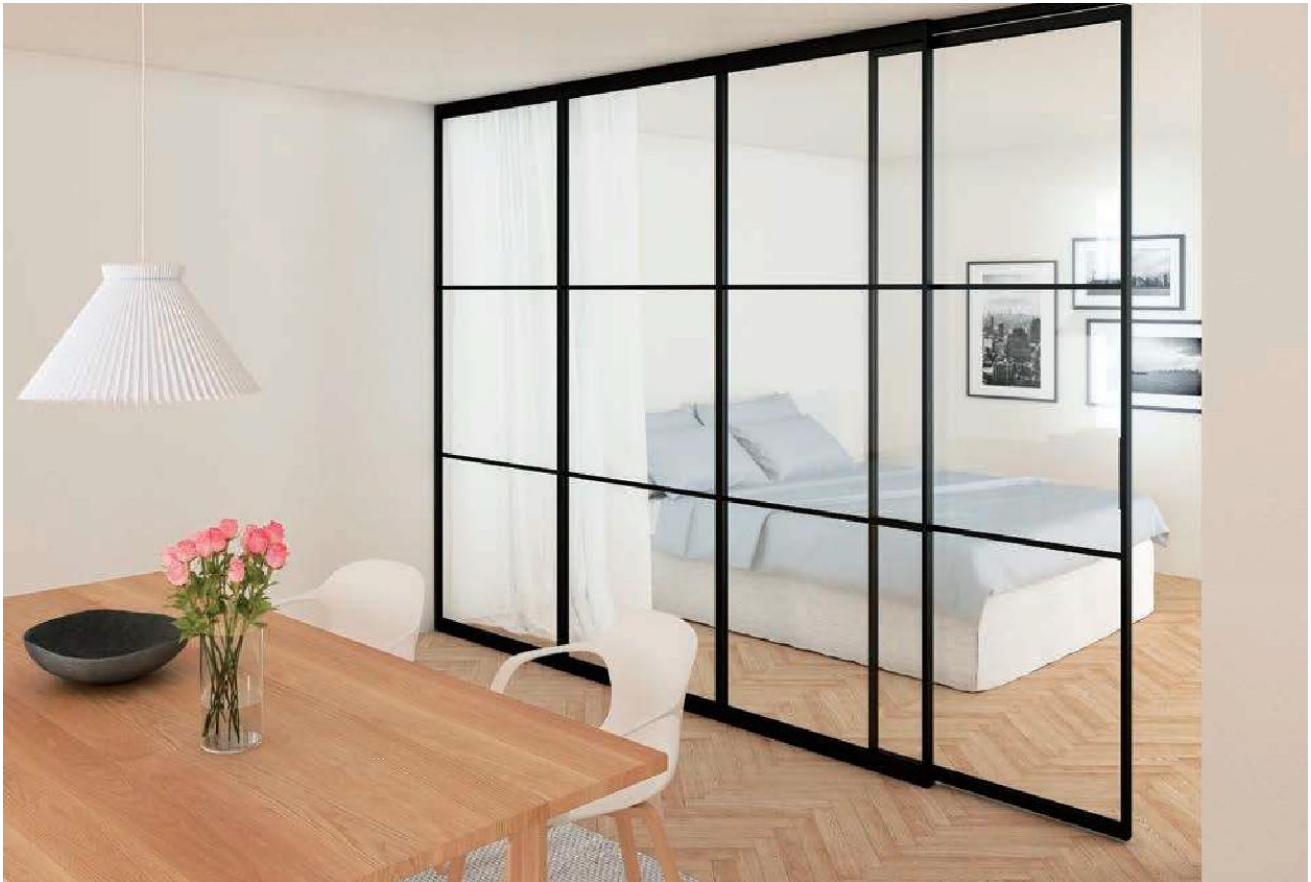

Sliding doors that open like fusuma partitions. Even when left open, they don't obstruct and neatly fit from floor to ceiling. Perfect for dividing spaces as entryways, and also suitable for use as stylish closet doors that showcase storage items elegantly.

Fixed type that can be used as a glass wall in places where no opening is required. It allows zoning of space while maintaining openness and eliminating the need for people to come and go. Depending on the frame and glass color, it's also possible to add accents to the interior. "Quadro Slim" not only serves as a sliding door or a door but also functions as a glass partition to divide spaces. In addition to the existing "FIX type," "FIX connected type" has been added, allowing for connection of 2 to a maximum of 4 panels. This enables the creation of open, spacious areas with a greater expanse, providing a sense of openness.

Unparalleled high-end luxury fittings expand the possibilities of space production

# Noppo

ノッポ

Slim frame and embedded soft closer  
make it even more beautiful and noiseless

The newly introduced Hight - Door specification, reaching a maximum height of 2700mm, responds to the trend of creating open and spacious environments. When the door is closed, its flat "surface" beauty stands out, while the sense of openness when opened is tremendous. Combining it with slim frames enhances the sleek appearance, contributing to a quieter space. And of course, not compromising on fundamental performance and details, the "Hight-Door" ensures reliability. For the glass type, it employs durable 5mm thick tempered glass to minimize breakage, and incorporates iron cores into the structure to prevent warping due to room temperature differences, demonstrating meticulous attention to safety and hidden aspects.

## Soft Closer Type

For slim frame type single-sided doors and parent-child doors, you can now choose a type with an inconspicuous recessed soft closer.

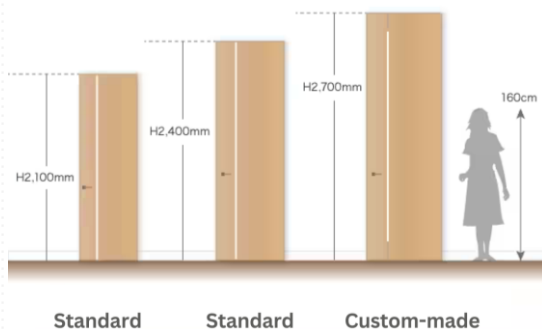

片開きドア スリム枠 フラット/ホワイト

Door - Noppo

When comparing the standard heights of 2100mm and 2400mm for the 'Noppo' door, the difference in feeling of openness is obvious. The high-door version allows for a more expansive space

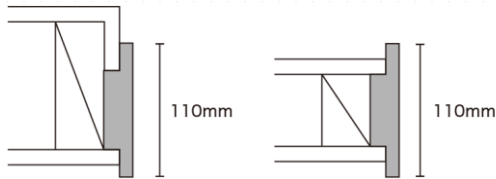

\*When using slotted glass, designs with frames above and below the glass are implemented for heights exceeding 2400mm.

**The slim frame creates a noiseless space with its thin 11mm profile.**

The 'Noppo', capable of accommodating up to 2700mm in height, is a minimalistic design that values the beauty of spacious 'surfaces'. Enhancing its charm further is the introduction of the slim frame type. Achieving a thickness of only 11mm for the frame, as opposed to the usual 20mm or more, accentuates the door's veneer and creates a sleek ambiance by minimizing the presence of the frame to the utmost extent

\* The recommended fit of the slim frame is as follows.

## ◆ Pocket (inwall) sliding door

The in-wall sliding door, which has been newly added to the sliding door variation, stores the open sliding door neatly in the door bag. The room looks larger, so it is recommended if you usually leave it open. In addition, even if it is open, the sliding door does not get in the way, so there is a high degree of freedom in the placement of furniture and other items. As an option, we also offer a wall panel set that can be easily installed.

Simplified construction of sleeve walls in the door bag  
 Wall panels are available as an option. You can easily install a sleeve wall for a door bag.  
 Since we use LVL (veneer laminate) with an iron core, warping is also considered.

\* Wall panels can be used up to a ceiling height of 2400 mm.

## ◆ Partition door

### Effective Use of Space with Sliding Doors

Japanese fusuma doors ( sliding doors) are excellent as movable partitions. When closed, they create separate spaces, and when open, they provide an open and spacious area. For creating versatile spaces, we recommend the tall, sliding doors reminiscent of fusuma. Being top-hung, they are barrier-free without rails on the floor, allowing for easy cleaning and enabling robotic cleaners to work smoothly.

# Pittala

| Custom-made storage

made in Japan

**New models with drawers and casters - everywhere in your home, it's a perfect fit with 'Pittara'.**

Adding to our customizable storage solutions with 1mm precision, we introduce a new type of 《Pittala》 .

The pull-out drawer type, known as 〈Drawer〉 , is perfect for combining with countertops in washroom spaces or aligning with TV units in the living room.

The 〈Move〉 variant, equipped with movable caster wheels, is suitable not only for washroom areas but also fits perfectly under desks in workspaces, serving as a mobile storage unit. Additionally, we have revamped the color variations, incorporating two trendy shades for a refreshed look.

# Pittala

## ■ Specifications

【Body, Door, Shelf】Olefin Sheet  
 【Handle】Push open specification  
 【Country of origin】Japan

## "Destroy" and "decorate" to realize the storage you envision in the ideal form

We will respond exactly to the storage you envision with a semi-order. The biggest attraction is that the width can be ordered in units of 1 mm between 450 mm ~ 1800 mm. In addition, the height and depth can be selected from 4 types, and it is also compatible with the float type. Please use it in various scenes for storage that becomes the main role in the living room and for storing a little dead space.

- Width W450~1800mm, can be ordered in 1mm increments
- Height and depth can be selected from 4 types each, and float type is also supported.
- The counter, side panel, and bottom panel are all 7 mm thick.

## ■ Color variations

Two new wood grain colors to our seamless single-tone palette for a fresh trend. Options include White, White Oak, and Greyish Wood, perfect for coordinating with our 'Noppo' doors. With 8 colors available, mix and match freely for both functional and decorative storage solutions, adding a playful touch to your walls.

## Pittala Hinged door type

Furniture-like cupboard with a depth of 500mm for the kitchen

It's like custom-made. Entranceway storage that extends to the full width

## Pittala Drawers Type NEW

W400~900: 1 drawer

W901~1800: 2 drawers

H600: 2 drawers

W1300×H400×D600

The specifications of the drawer vary depending on the size, allowing you to choose the number and height of drawers according to the items you want to store. The interior color of the drawers is uniformly gray, making it easy to see stored items.

## Pittala Move (on casters) NEW

Featuring casters for added versatility, the Move storage unit enhances functionality. Its smooth mobility makes it convenient for cleaning tasks as well. The two-tiered drawers, with adjustable depths, boast a sleek push-open design on the front. The bottom casters are discreet and include locking mechanisms for stability.

# Pittala

## Expanding the world of Pittala, TV Board and Tall Type

The 〈TV Board〉 features a front door with a mesh design that allows infrared signals to pass through for remote controls and similar devices. With the same coloring as regular Pittala storage units, it can create a unified space. The 〈Tall Type〉, addressing popular demand, boasts a maximum height of 1800mm, providing ample storage space. It can be combined with washbasin counters or used as unique storage units to adorn living room walls.

# Acquretta

| Outdoor/Slop Sink

made in Japan

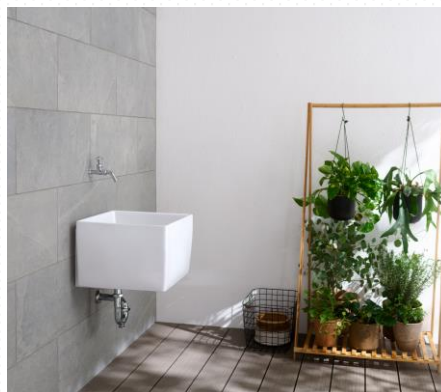

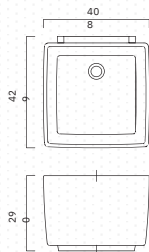

## Sleek Slope Sink with a Pursuit of Beauty

A slop sink that allows you to wash anything without worry is a versatile addition to both indoor and outdoor spaces such as balconies, gardens, and laundry rooms. The 'Acquretta' sink boasts a simple and elegant design, characterized by flat surfaces and straight lines typically difficult to achieve with ceramics, along with the industry's thinnest profile. Additionally, it features minimal dimensions and thoughtful placement to maximize usability and fit into any space, while its square form appears to float due to the concealed rear mounting. These meticulous details, previously unseen in slop sinks, ensure that even when not in use, it seamlessly blends into everyday life with beauty.

# Mini Gabion

| Gardening Goods/ Outdoor Goods

Not only on the outside, but also indoors, how to use it depends on the idea

"Gabion" is a mesh basket filled with natural stones and it has been used for river revetments. In recent years it has also attracted attention for the exterior of houses. sanwacompany commercialized it as one of the garden tools for customers. The expression changes depending on what you put inside, so you can enjoy creating a unique space according to the purpose, such as stone walls, gateposts, and green pots.

## Blend in with the plants to create a natural ambiance

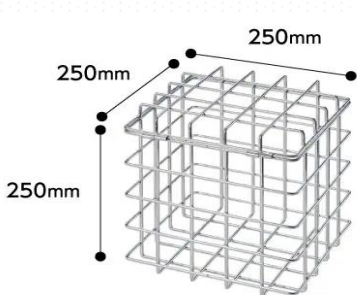

For instance, they can be filled with natural stones and utilized as fences or retaining walls. This creates a pleasantly rustic feel and harmonizes well with nearby plantings. Additionally, ideal split chestnut stones are available separately for filling. Moreover, aside from stones, they can also be filled with firewood or similar materials, serving as both a decorative element and a storage space.

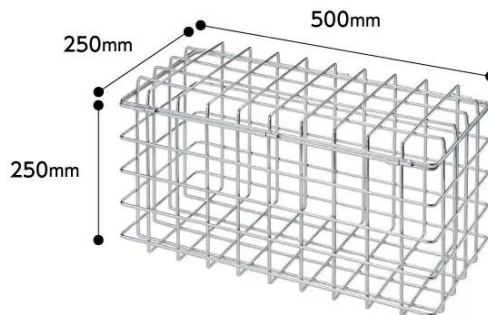

**Great item for also indoor and outdoor activities such as camping.**

In addition to the appearance of the exterior, it can be used as a barbecue table when camping, as a table, stool, planter cover, magazine rack, etc. The beautiful stainless steel finish blends well with the interior, and the corners are bent for safety.

# Ostrape

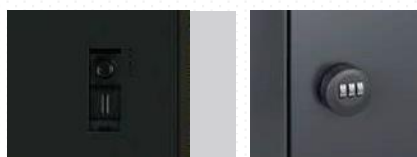

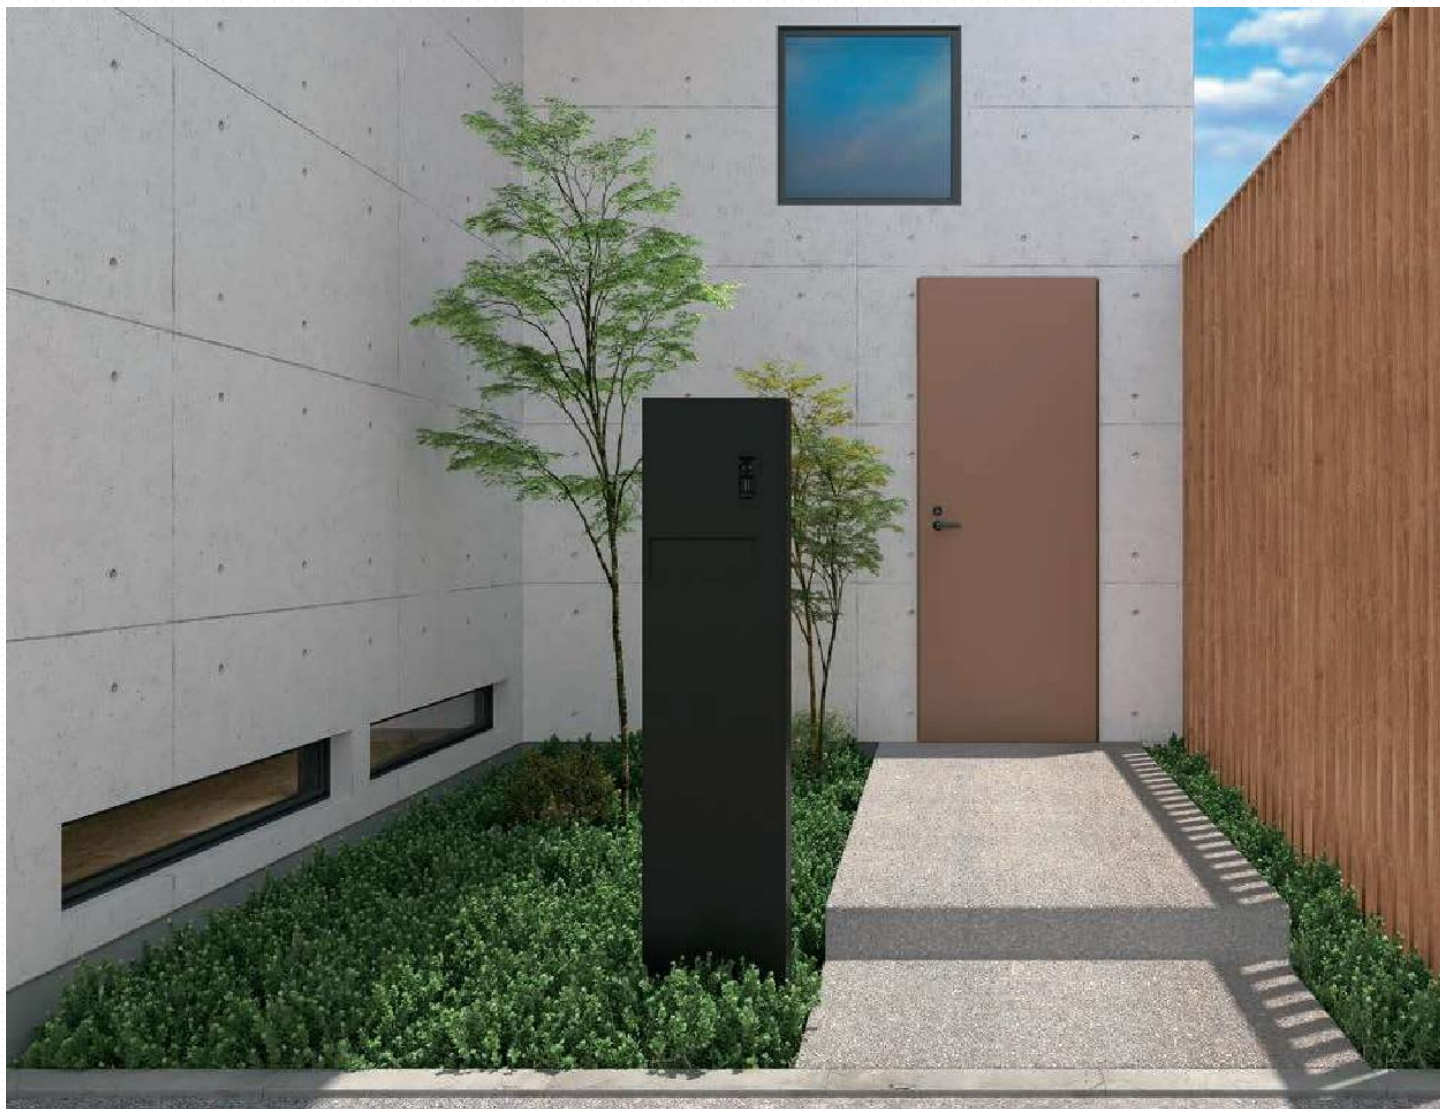

| Gatepost

made in Japan

Can be installed anywhere

Noiseless function gatepost with hidden functions

The "Ostrape" functional gatepost has a beautiful appearance that makes the presence of the intercom and mailbox virtually invisible. The trapezoidal cross-section allows for installation in places with narrow depths and smooth access to mail from the side. The flat design without any unevenness and the high-quality matte black finish harmonize with the facade of any house.

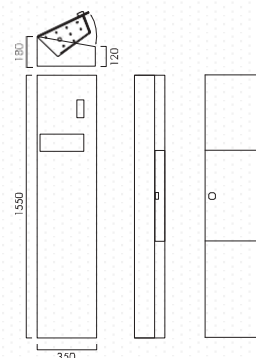

Neat-looking  
built-in intercom

Dial lock matches  
the body color

The trapezoidal design, viewed from above, provides an angle that makes it easy to retrieve mail from the approach without having to go around. Since the door is not visible from the street side or from the side, it is safe and secure without alerting the public to the presence of mail.

EX21001 Right-hung for take-out  
EX21011 Left-hung for take-out

# Ospole

| Gatepost

made in Japan

## Seamless functional gatepost in pursuit of simple modernity

This functional gatepost integrates basic functions such as a built-in intercom as well as a post box. The seamless design, with minimal waste, blends in with the exterior of any home while subtly asserting its presence. The "OSPOLE," which utilizes the material feel of stainless steel as it is, and the "MATTE BLACK" and "MATTE WHITE," which have a low luster texture, are also available to coordinate with the entrance door and eaves.

# Ospole Delivery Box

| Delivery Box

made in Japan

**A smart delivery box that receives packages on behalf of the family**

The "OSPOLE Delivery Box" combines an intercom panel, a mailbox, and a box for receiving parcels even when you are not at home. It is recommended for families that go to work or are frequently away from home. It is available in three colors: stainless steel, matte white, and matte black. The sophisticated design of the OSPOLE series creates a clean entrance area without making the presence of the delivery box felt.

# Osboard

| Intercom Cover

made in Japan

## Minimalist wall-mounted intercom cover comes in a single board

The entrance of a house has many components such as the entrance door, nameplate, mailbox, and intercom, making it difficult to unify the design. For those who has that feeling, Osboard is recommended.

The three functions necessary for an entrance - intercom, post, and nameplate - can be beautifully integrated into a single unit.

The square form stands out for its flat, floating and slim design is a perfect match to the existing "#Bretta" mailbox.

The square form stands out for its flat “surface” and the beauty of its paintwork. It looks like a single plate, and the size of the openings that allow the camera, microphone, and buttons to function has been minimized.

# Bretta

| Mailbox

made in Japan

## Minimal design that looks like a single board

The "Bretta" has been stripped of all functions other than those necessary for a mailbox, so that the lock and mail slot are not visible from the front, giving it a clean, single-panel look. A total of six colors are available, including basic and trendy colors for the exterior. There is enough space inside for an A4-size envelope. It blends neatly into the exterior and creates a minimalist space without waste.
